

Manage your fuel from one platform

Fuel View Software

Integrated fuel management and reporting for your entire fleet

Fuel View-At-A-Glance, Department-At-A-Glance, and Tank Level Management screens

Ward Fuel View is the industry's most flexible and comprehensive tool for fleet-wide fuel management and control. Monitor key performance indicators and implement validation rules on fuel management and vehicle usage, for comprehensive transaction records for vehicles, drivers, and pumps. Automate and control fuel access, data collection, tank level monitoring, and site reporting.

User-friendly, SaaS interface allows for adding, modifying, and removing asset and employee information. Templates provide faster data entry, reduced entry error, and reporting consistency. Business intelligence based reporting and query functionality provides detailed, decision-making data.

Multiple At-A-Glance screens, group-level reports, pre-configured or easily customizable data fields, and audit trails ensure total accountability, all in near real time.

i See our SaaS Brochure for full details on our SOC2 certified hosting platform.

KEY VALUES

- Lower and manage operating costs throughout your fleet
- Only one license needed for unlimited users
- Automate access to fueling and accounts with absolute certainty every drop of fuel goes into the identified vehicle
- Decrease response time with customizable alerts and alarms for fuel transactions, vehicle usage, and storage tank levels
- Detailed insight to the status of sites, overall fleet and individual vehicles with At-A-Glance screens and reports
- Faster, more accurate fleet analysis with pre-programmed, complex datasets to print, share, and export

Manage fuel and vehicle fluids in real-time. Oversee your entire fleet's fuel status from anywhere.

Fuel View SaaS will interface directly with EV chargers that have OCPP v1.6. OCPP compliant data availability is based on individual charger manufacture outputs.

KEY FEATURES

- Enterprise Class .Net scalable, web-based application
- Minimal need for software support
- Global record updates
- Multi-level, role-based security
- Reports allow grouping up to 10 levels

Security

Completely customizable security features. Define user access levels to assets by division or location; specify levels in any configuration or combination.

- ✓ User authentication integrated with Active Directory
- ✓ User-friendly browser based SSL interface
- ✓ User-specific password roles (manager, operator, analyst, etc.)

Data Query Reporting

Advanced query functions enable analysts to quickly generate customized reports without having to search through lengthy files and records. Fuel View provides the most timely, accurate, and reliable data reporting available.

Interfaces

Fuel View integration options:

- ✓ Fleet Management
- ✓ GPS/AVL
- ✓ HR
- ✓ Security
- ✓ Accounting

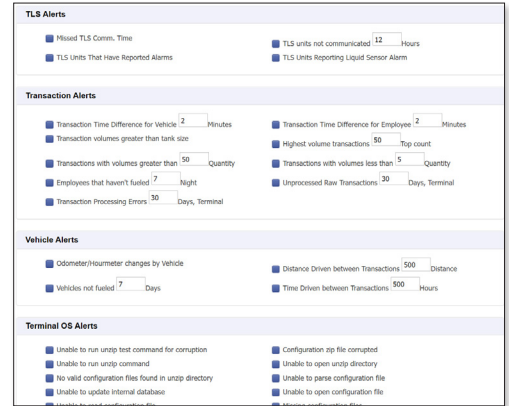

i Options run from flat file exports to complete web services database level exchange API's.

Database

- ✓ Database support for Microsoft SQL and Oracle
- ✓ Database core structure has been preserved so current customers will not lose their custom integrations (exports, 3rd party reporting, etc.)
- ✓ Easily upgradable

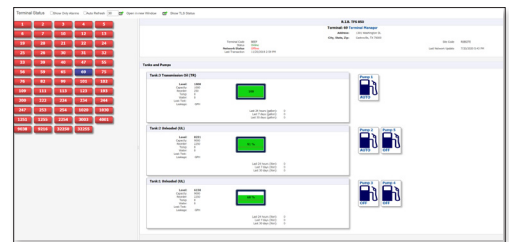

Vehicle-at-a-Glance Screen
(Location requires optional GPS device)
