

Integrated Solution for Samsara GPS & Telematic Devices

Ward - Go Fuel - Interface®

Fuel authorization interface for Ward Fuel Management customers

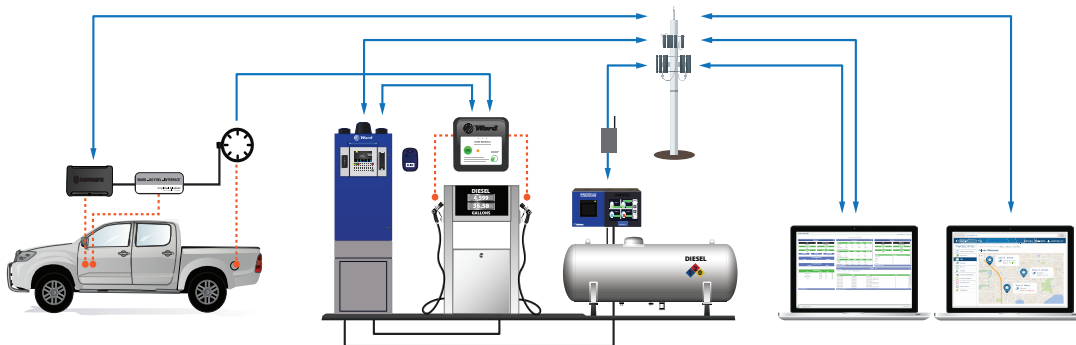

The Ward - Go Fuel - Interface (WGFI) is an integrated solution for odometer validation and OBDII data sharing between **Samsara** Gateway device and Ward's Fuel Management system.

The WGFI communicates with a Fuel Control Terminal (FCT) to automate fueling access. The FCT collects and transmits the fuel transaction data, VIN, odometer, and engine hours to Fuel View SaaS, and all GPS and telematics collected are sent to the third-party software.

KEY BENEFITS

- 100% compatible interface with integrated devices and Ward Fuel Management Solution
- Authorize access to any controlled fuel dispenser

Specifications

Supported Devices	VG54-NA, VG54-NAH
Voltage	5VDC (from USB connection)
Electrostatic Resistance	Non-conductive enclosure
Operational Temperature	-40°C to 85°C
Humidity	+85% RH per SAE specification
Dimensions	1.5 x 1 x .5 in (W x D x H)

SF - Go Fuel Interface - Samsara 08/2024
